CRM & SALES PERFORMANCE ANALYSIS

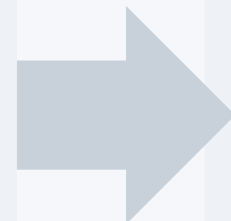

PREPARED BY:
JANE TULIO

Data Analysis Process

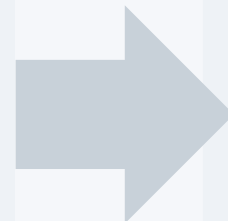

Underatanding the Data

Reviewed the customer and transaction datasets.

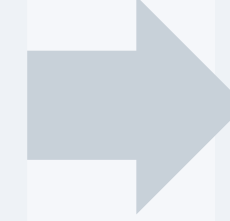

Data Cleaning & Preparations

Cleaned dates and missing values, standardized customer information, and created helper fields needed for analysis.

Data Analysis & Visualization

Created tables, PivotTables, and charts, including CRM segmentation.

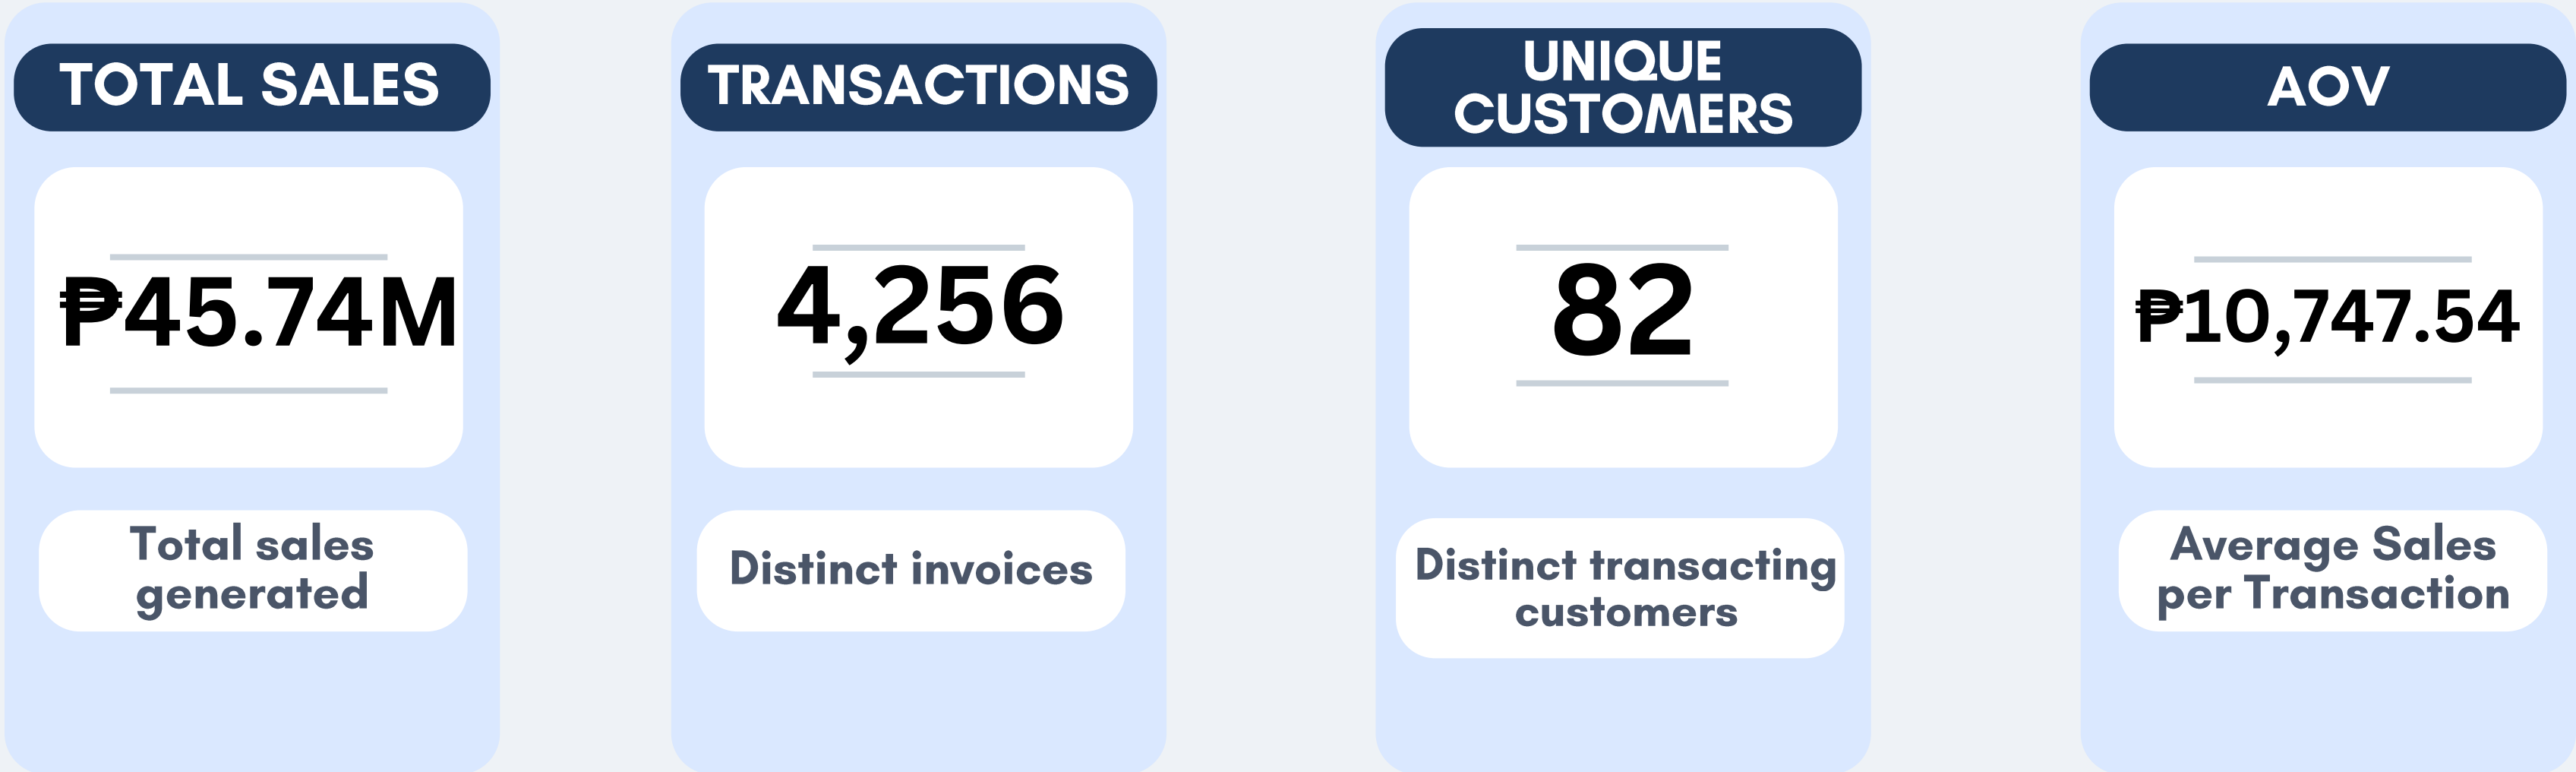

Insights & Recommendation

Identified key findings and developed actionable recommendations.

Executive Summary

Brand ABC CRM & Sales Performance

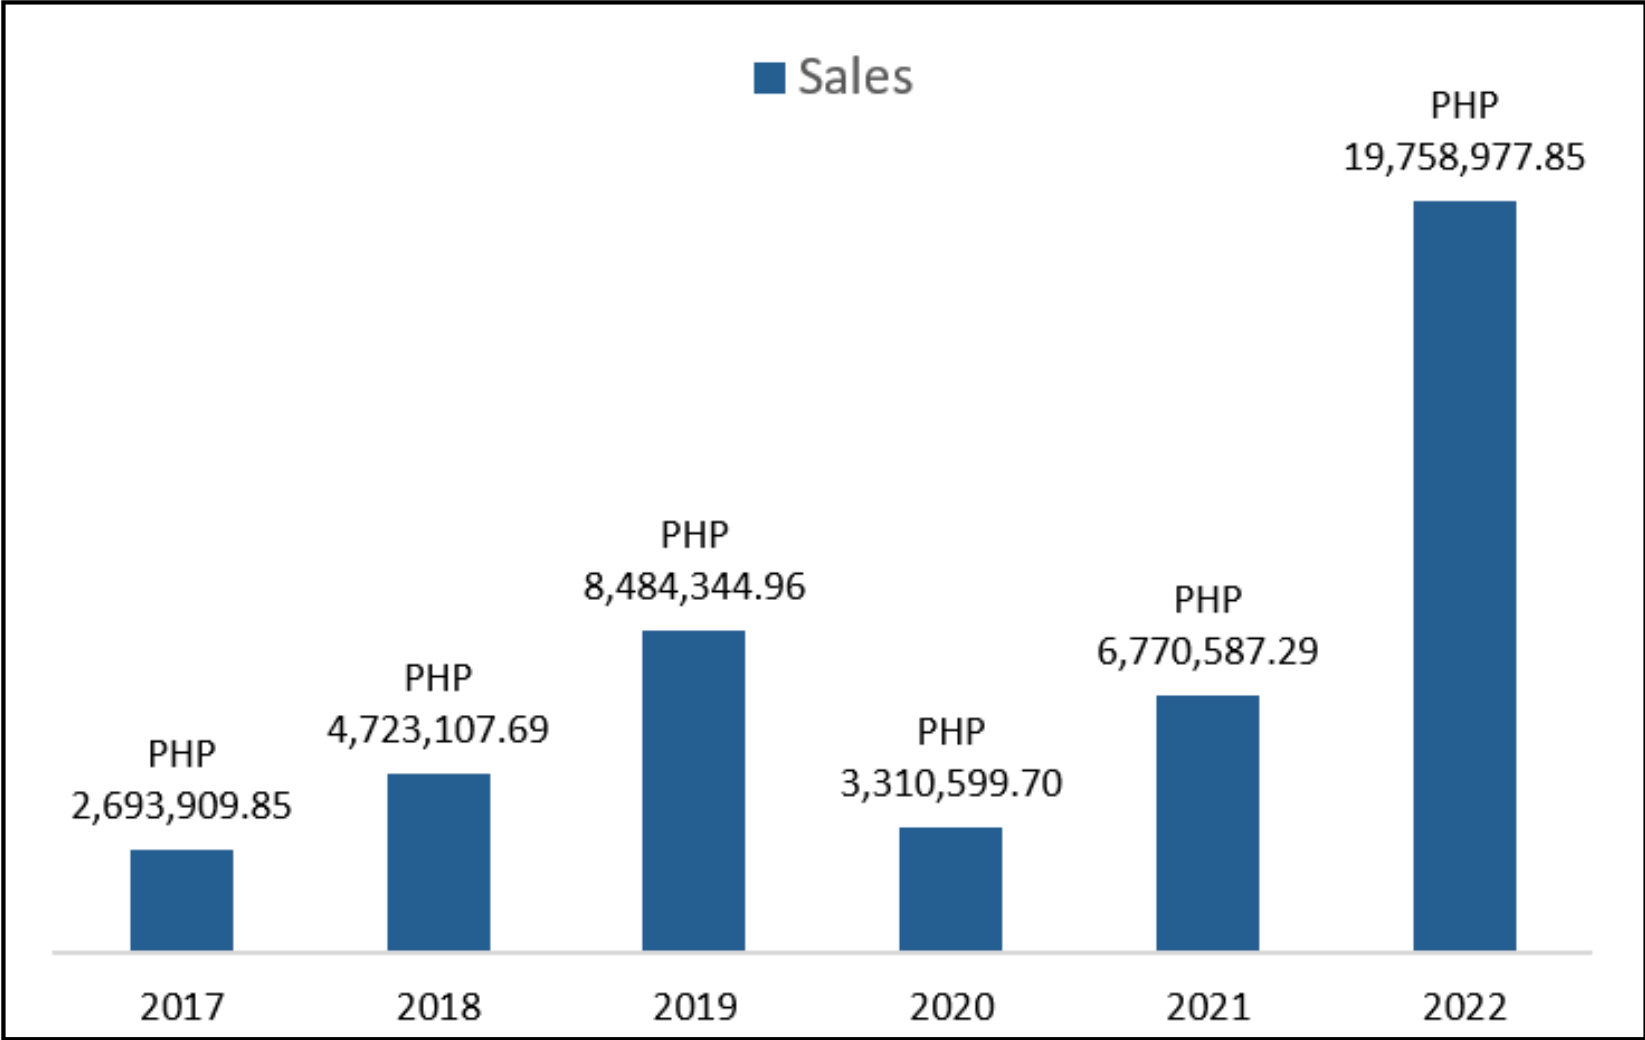

**Summarizes Brand ABC's overall sales performance, transaction volume, customer reach, and average order value.*

Brand ABC generated ₱45.74M in sales across 4,256 distinct transactions, with an average order value of ₱10,747.54.

YOY Sales Performance | 2017-2022

Annual Sales Trend and Average Order Value

SALES TREND CHART

**Shows annual sales performance, year-over-year sales growth from 2017 to 2022 and changes in AOV.*

KEY DATA

Year	Sales Growth %	AOV
2017		PHP 9,941
2018	75%	PHP 10,335
2019	80%	PHP 11,033
2020	-61%	PHP 9,378
2021	105%	PHP 9,590
2022	192%	PHP 11,623

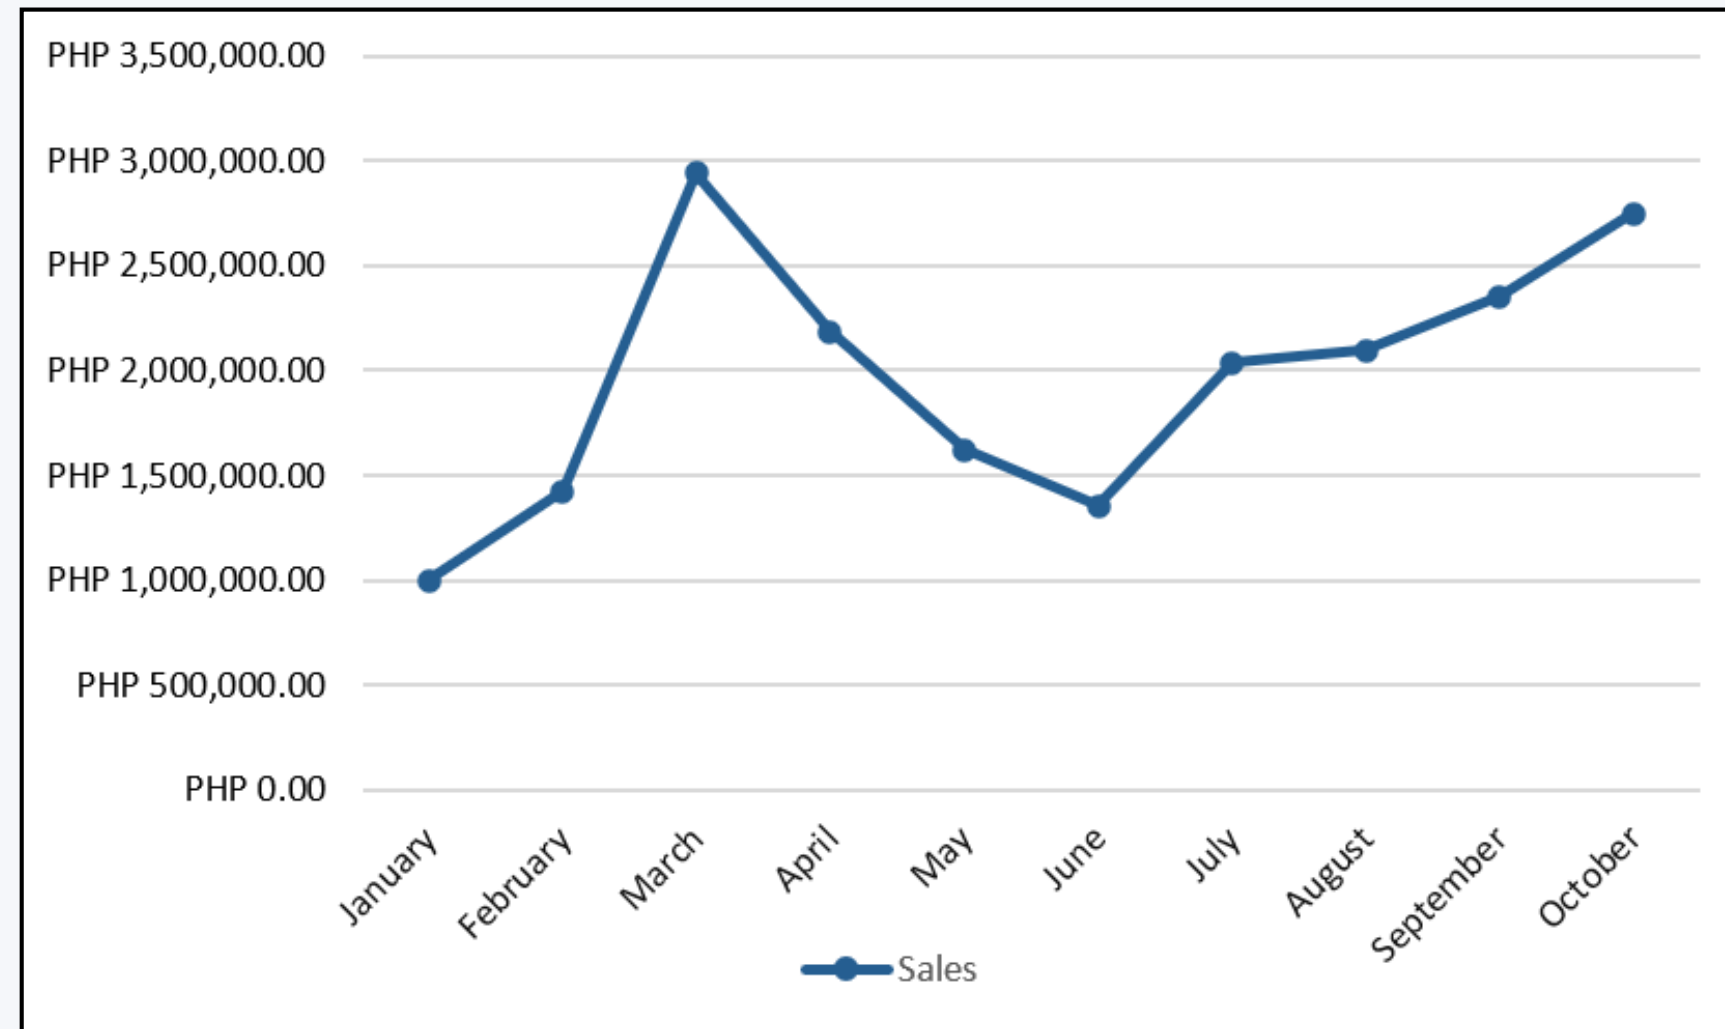

Key Insight: Sales grew consistently from 2017-2022, declined by 61% in 2020, followed by a strong recovery in 2022. AOV also increased from ₱9,941 to ₱11,623.

Recommendation: Increase inventory and capacity to support higher order volume. Introduce bundles to leverage the rising AOV.

2022 YTD Sales Performance | Jan-Oct

Monthly Sales, Transaction Volume and AOV

Monthly Sales Graph

**Shows monthly sales performance from January to October 2022, highlighting peak and low sales months and AOV performance.*

Performance Highlights

Peak Month

MARCH

**₱2.94M
Sales**

Lowest Month

JUNE

**₱1.35M
Sales**

Highest AOV

OCTOBER

₱13,142

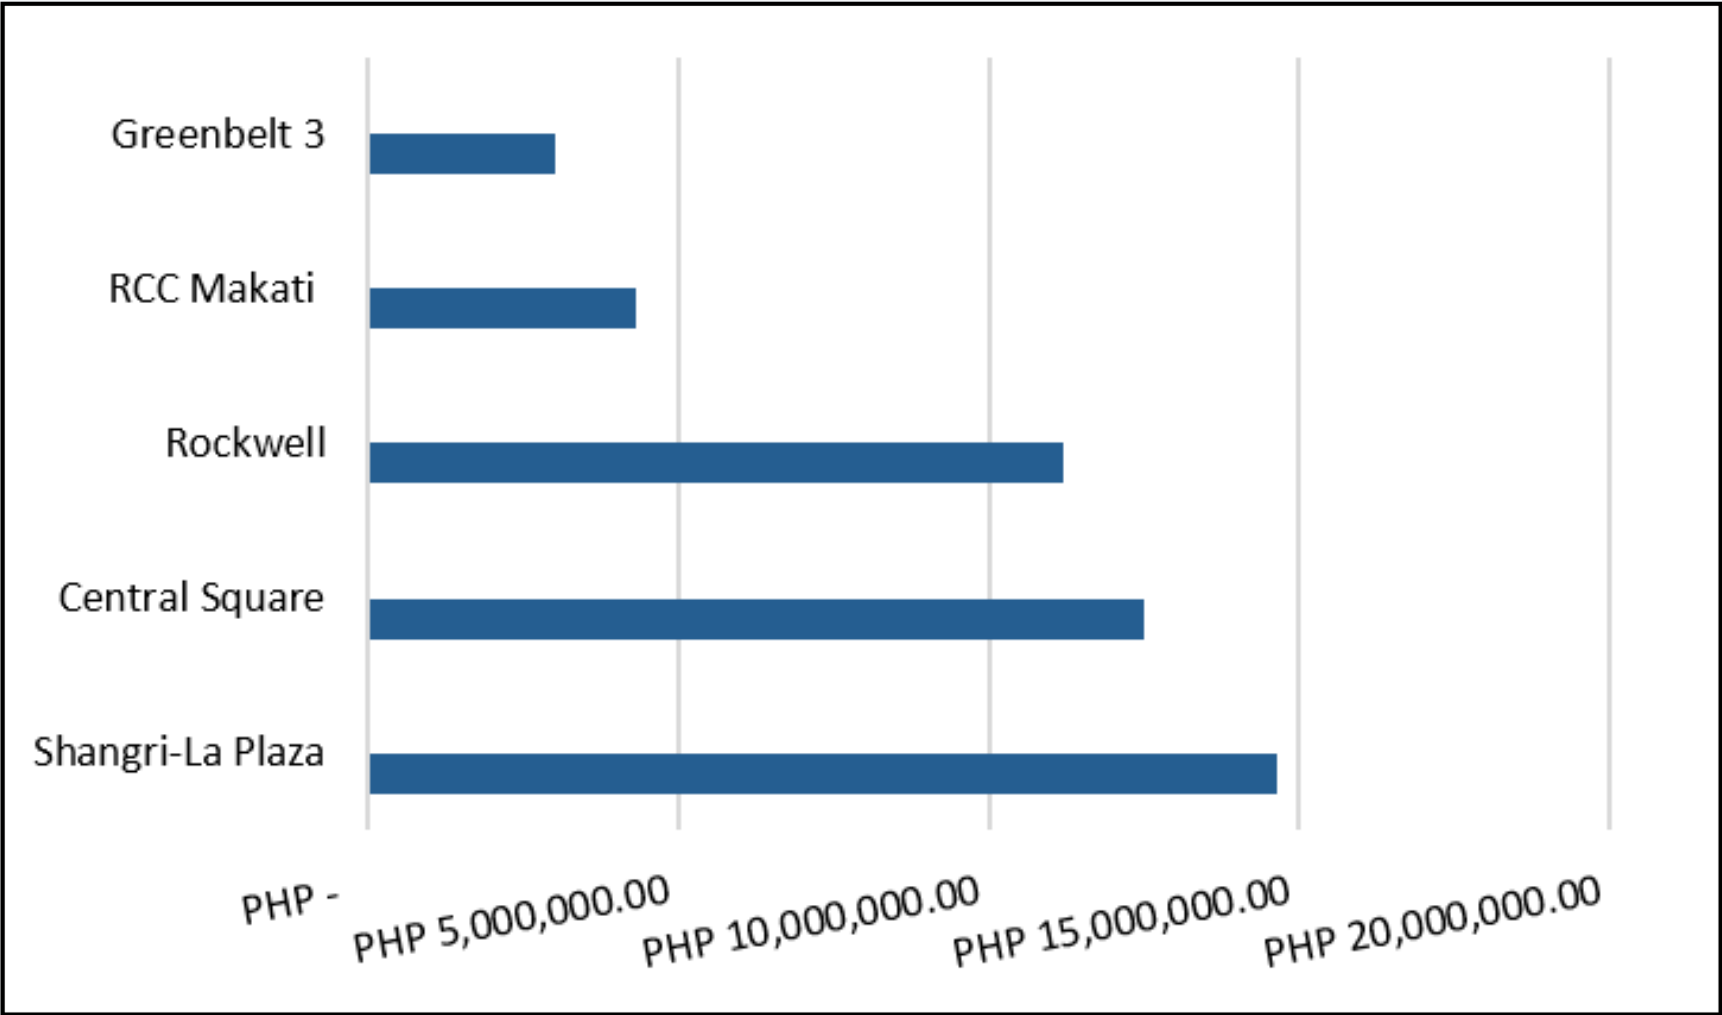

Key Insight: Monthly sales fluctuated throughout the year, peaking in March and reaching the lowest level in June. AOV increased to ₱13,142 in October.

Recommendation: Run targeted promotions during slower months such as May and June, while preparing inventory for the expected holiday demand.

Store Location Performance

Sales Contribution and Customer activity by Location

Sales by Store

**Shows sales performance and customer activity across store locations, highlighting the highest-performing stores.*

Top Performing Stores

Shangri-La Plaza

1

₱14.65M

Central Square

2

₱12.51M

Rockwell

3

₱11.22M

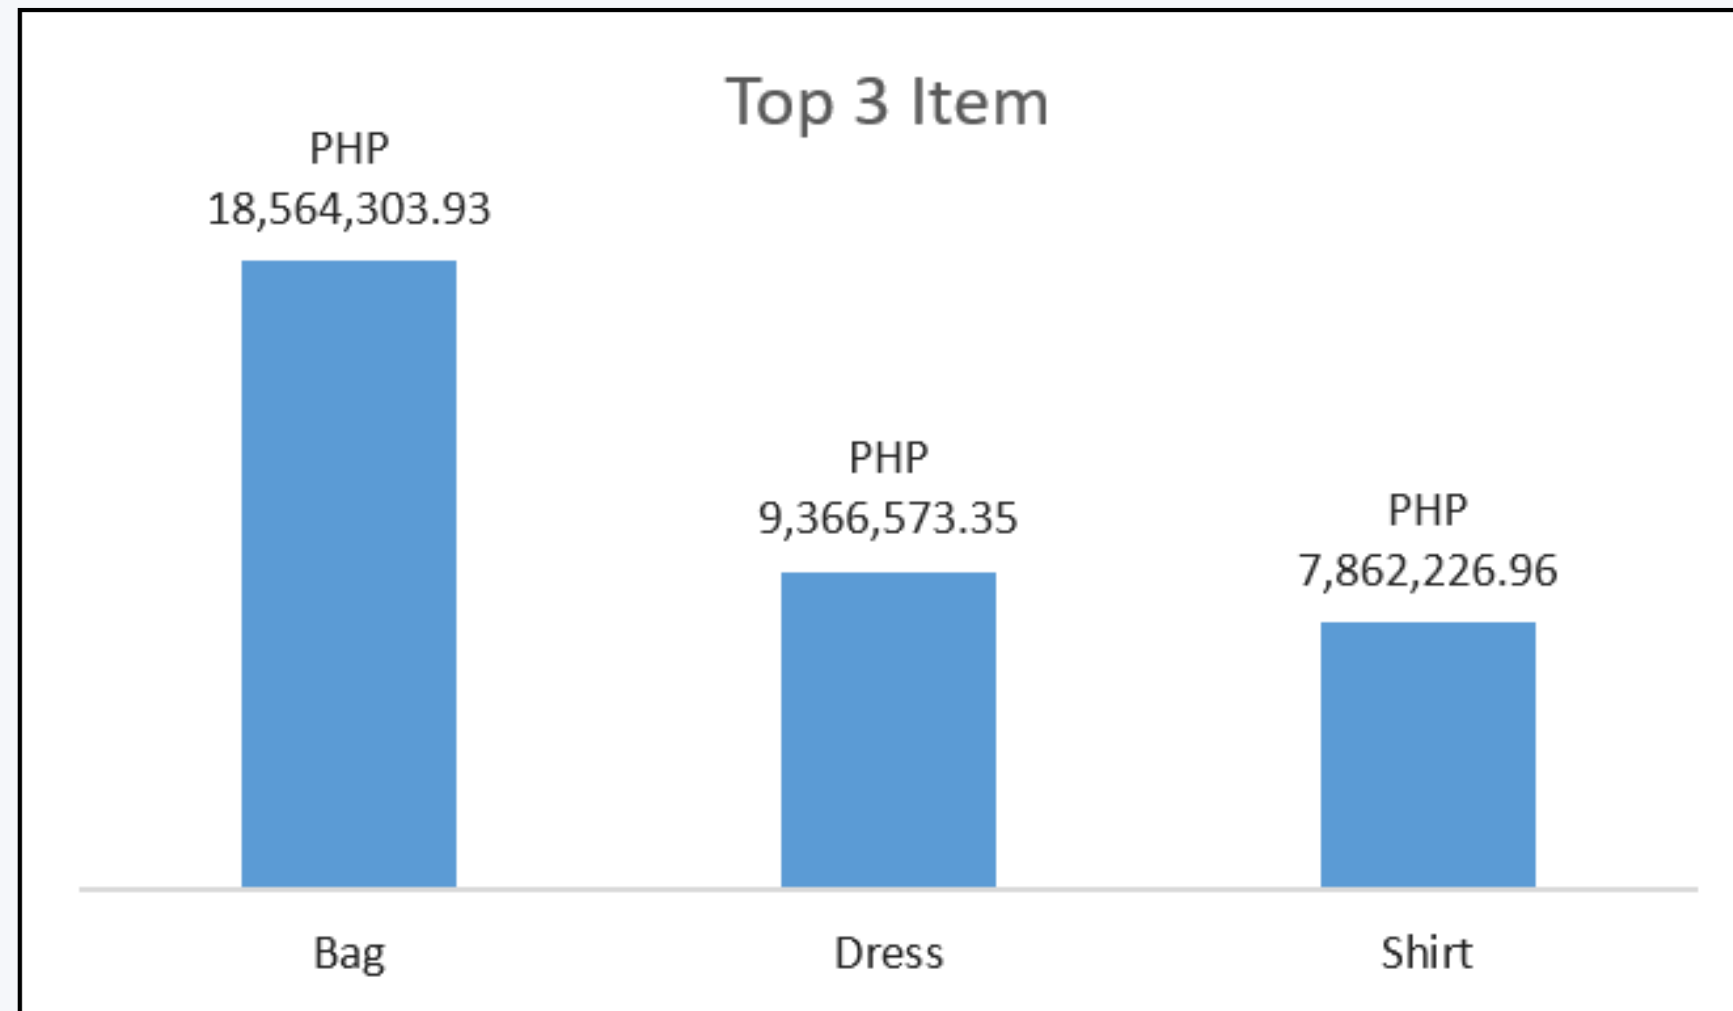

Key Insight: Shangri-La Plaza generated the highest sales at ₱14.65M and recorded the highest number of unique customers among the stores.

Recommendation: Prioritize inventory and product launches at high-sales locations while developing targeted marketing strategies to increase activity at stores with lower sales and customer traffic.

Top 3 Selling SKUs

Highest-selling items based on Total Sales

Sales by SKUs/Item

**Shows the top three selling items based on total sales and their corresponding units sold.*

Product Highlights

BAG

1 **₱18.56M** 1,497 units

DRESS

2 **₱9.37M** 853 units

SHIRT

3 **₱7.86M** 883 units

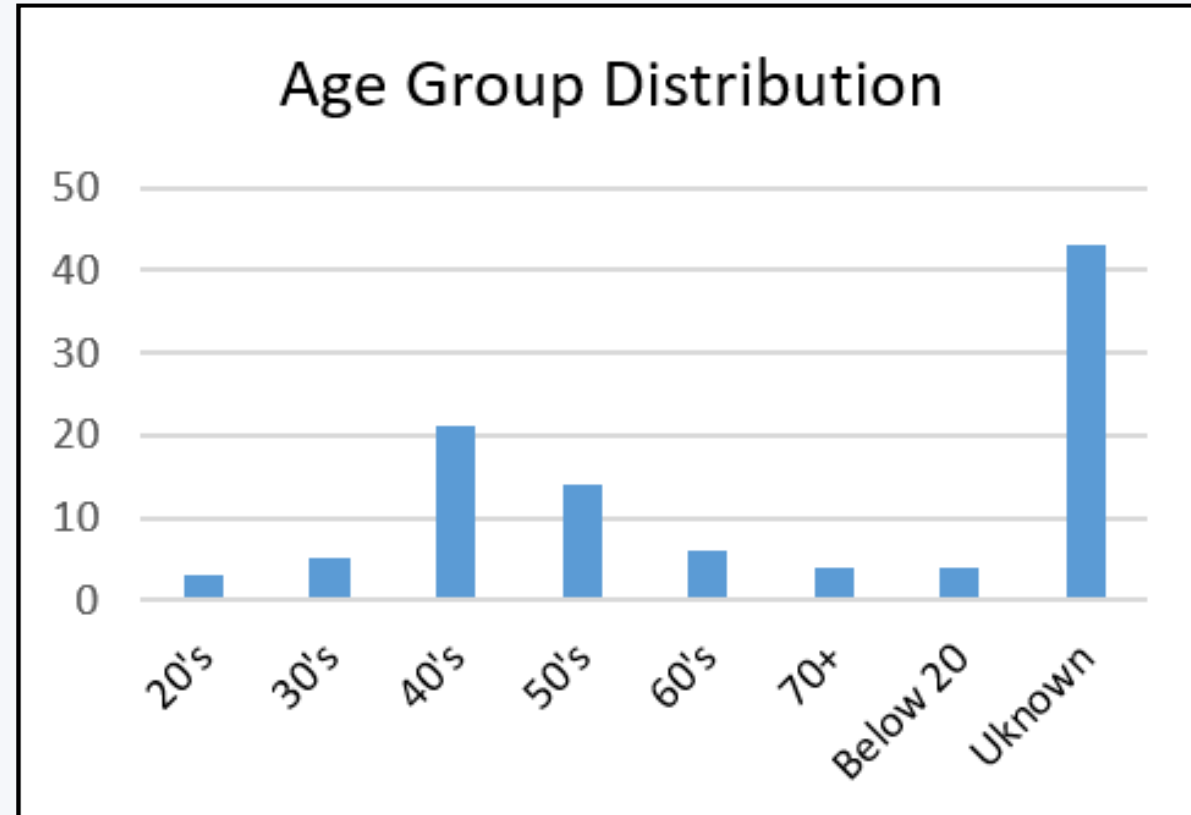

Key Insight: Bags are the strongest revenue-generating item with ₱18.56M, significantly outperforming the other top-selling products.

Recommendation: Maintain sufficient bag inventory and introduce complementary products or bundles to encourage cross-category purchases.

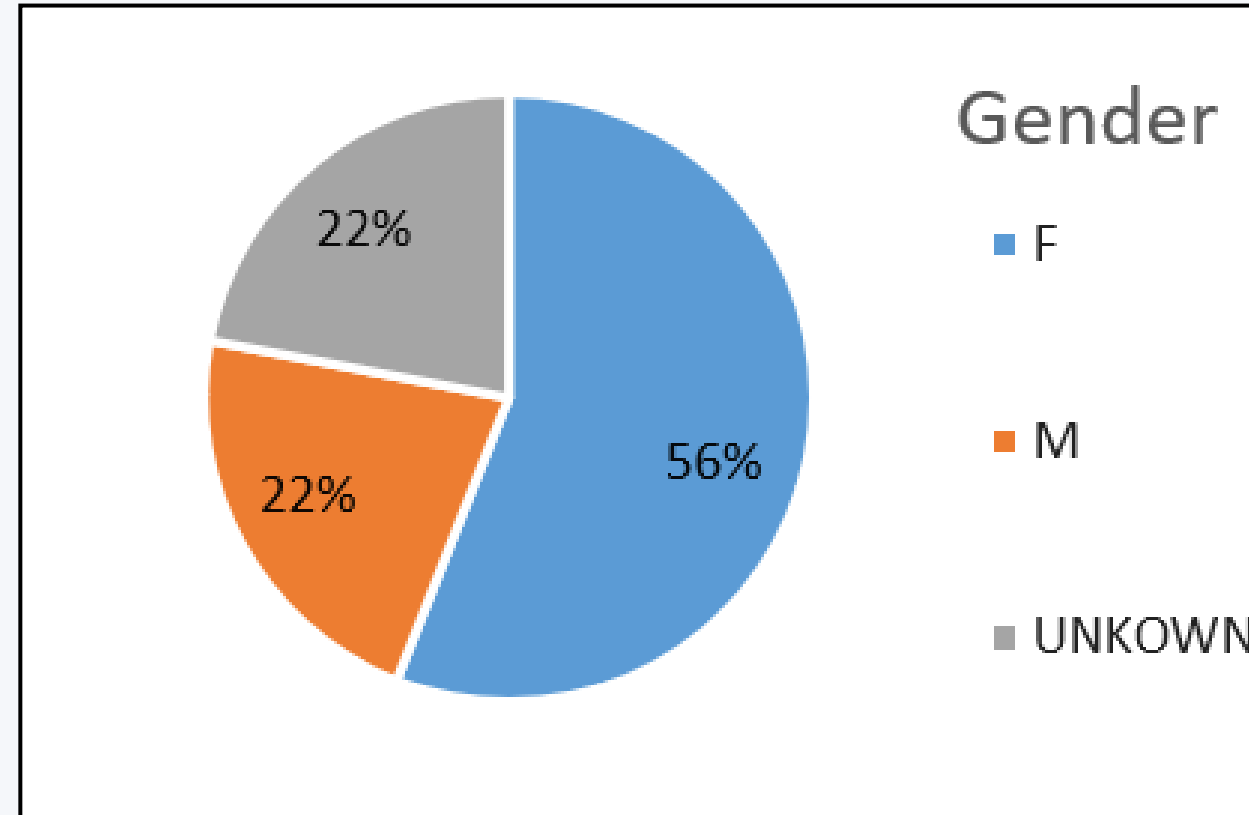

Shopper Demographics

Understanding the customer profile and CRM contactability

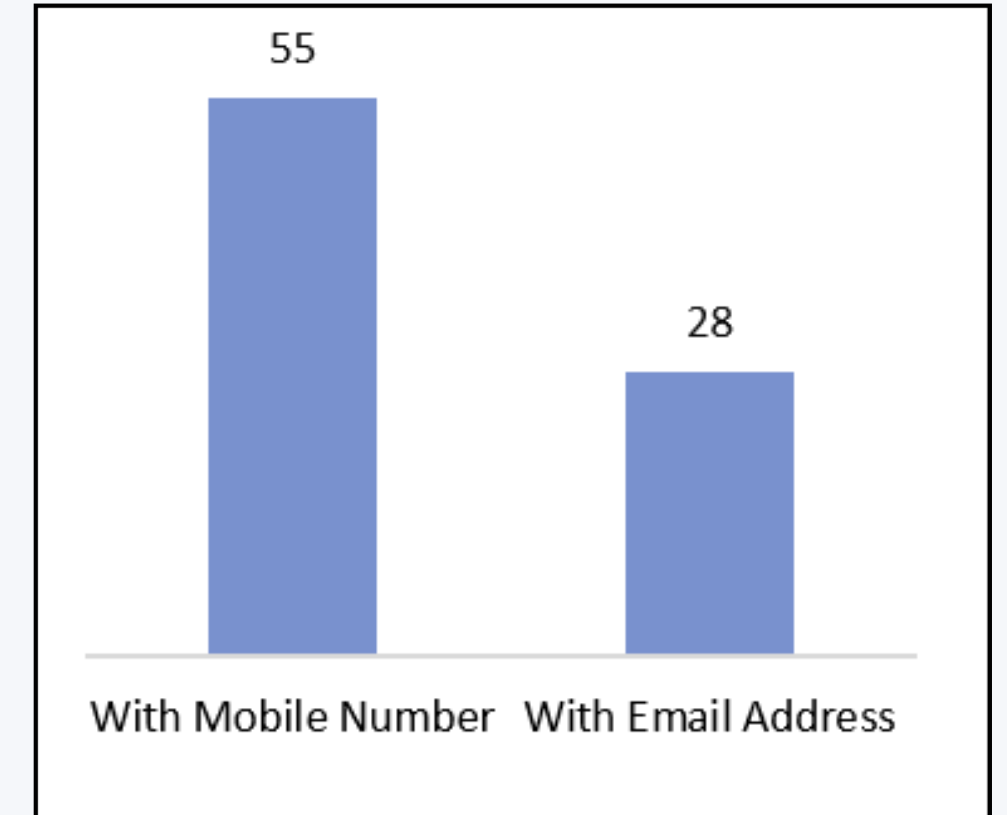

Age Group

Gender

Contact Info

****Shows the demographic profile of customers and the availability of mobile and email information for CRM use.***

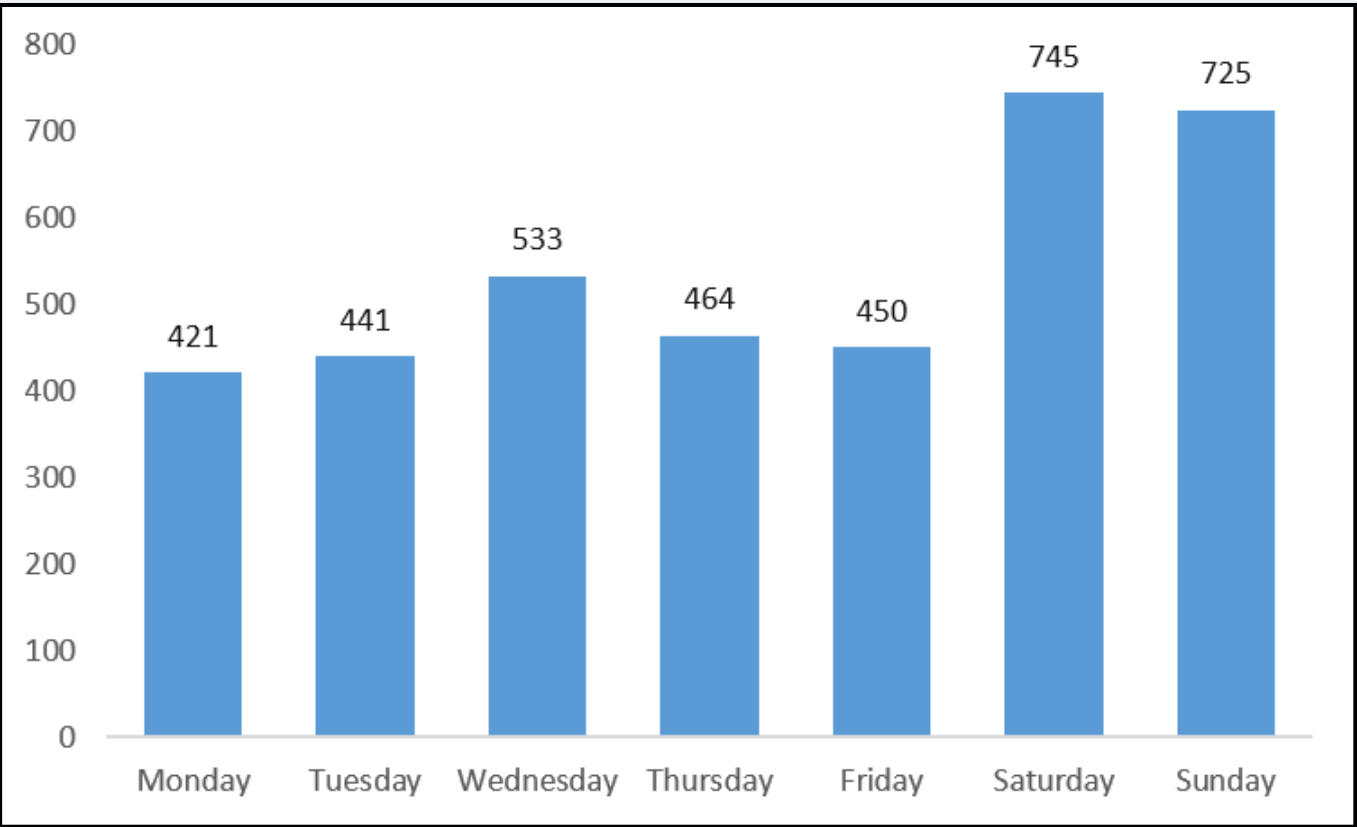

Key Insight: Customers in their 40s are the largest identified age group, while female shoppers represent the majority of known gender records. A significant portion of demographic data is incomplete.

Recommendation: Improve collection and updating of demographic and contact information to support more targeted CRM campaigns.

Shopping Behavior

When and where customers shop

Day of Week

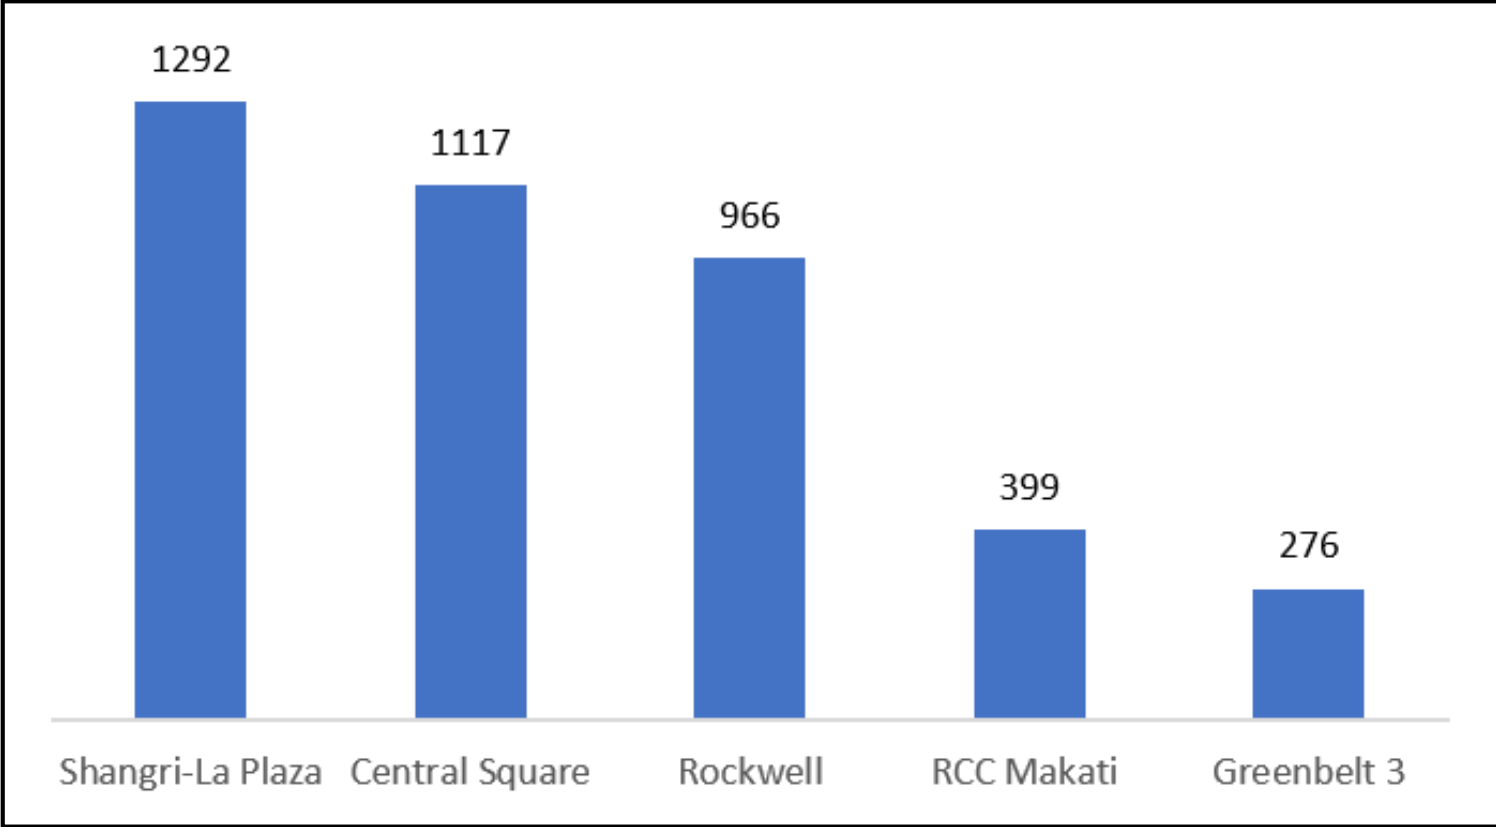

Top Shopping Day

SATURDAY

20% OF TRANSACTIONS

Store Preference

Top Store

Shangri-La Plaza

79 UNIQUE CUSTOMERS

**Shows customer shopping activity by day of the week and store location, with the top-selling SKU highlighted.*

Key Insight: Customers shop most actively during weekends, with Shangri-La Plaza showing the highest customer activity.

Recommendation: Increase staffing and stock availability during peak shopping days and prioritize high-demand products at the busiest locations.

CRM Segmentation Criteria

#	CRM Segment	Visit Count Requirement	Recency Window (Last Visit)	Strategic Definition
a	Loyal	≥ 3 visits	In the past 12 months (0–12 mos)	Core high-value active customers
b	Engaged	2 visits	In the past 12 months (0–12 mos)	Repeat customers with growth potential
c	New acqui	1 visit	In the past 6 months (0–6 mos)	Recently onboarded first-time buyers
d	One timers	1 visit	7 to 12 months ago	First-time buyers at risk of slipping
e	Lapsers	Any visits (≥ 1)	13 to 24 months ago	Formerly active, declining engagement
f	Sleepers	Any visits (≥ 1)	25 to 36 months ago	Dormant buyers requiring win-back
g	Churned	Any visits (≥ 1)	≥ 36 months ago	Inactive customers, high churn probability
h	Lead only	0 visits (No visit)	No transaction recorded	Registered prospects without purchase

CRM Segmentation (Methodology)

Helper Columns:

1. **Customer Number** – Master customer list from the Customer Base, covering 100 registered customers.
2. **Total Visit** – Number of distinct transactions/invoices made by the customer.
3. **Last Visit** – Most recent purchase date recorded for the customer.
4. **Days Since Visit** – Number of days since the last purchase as of October 31, 2022.

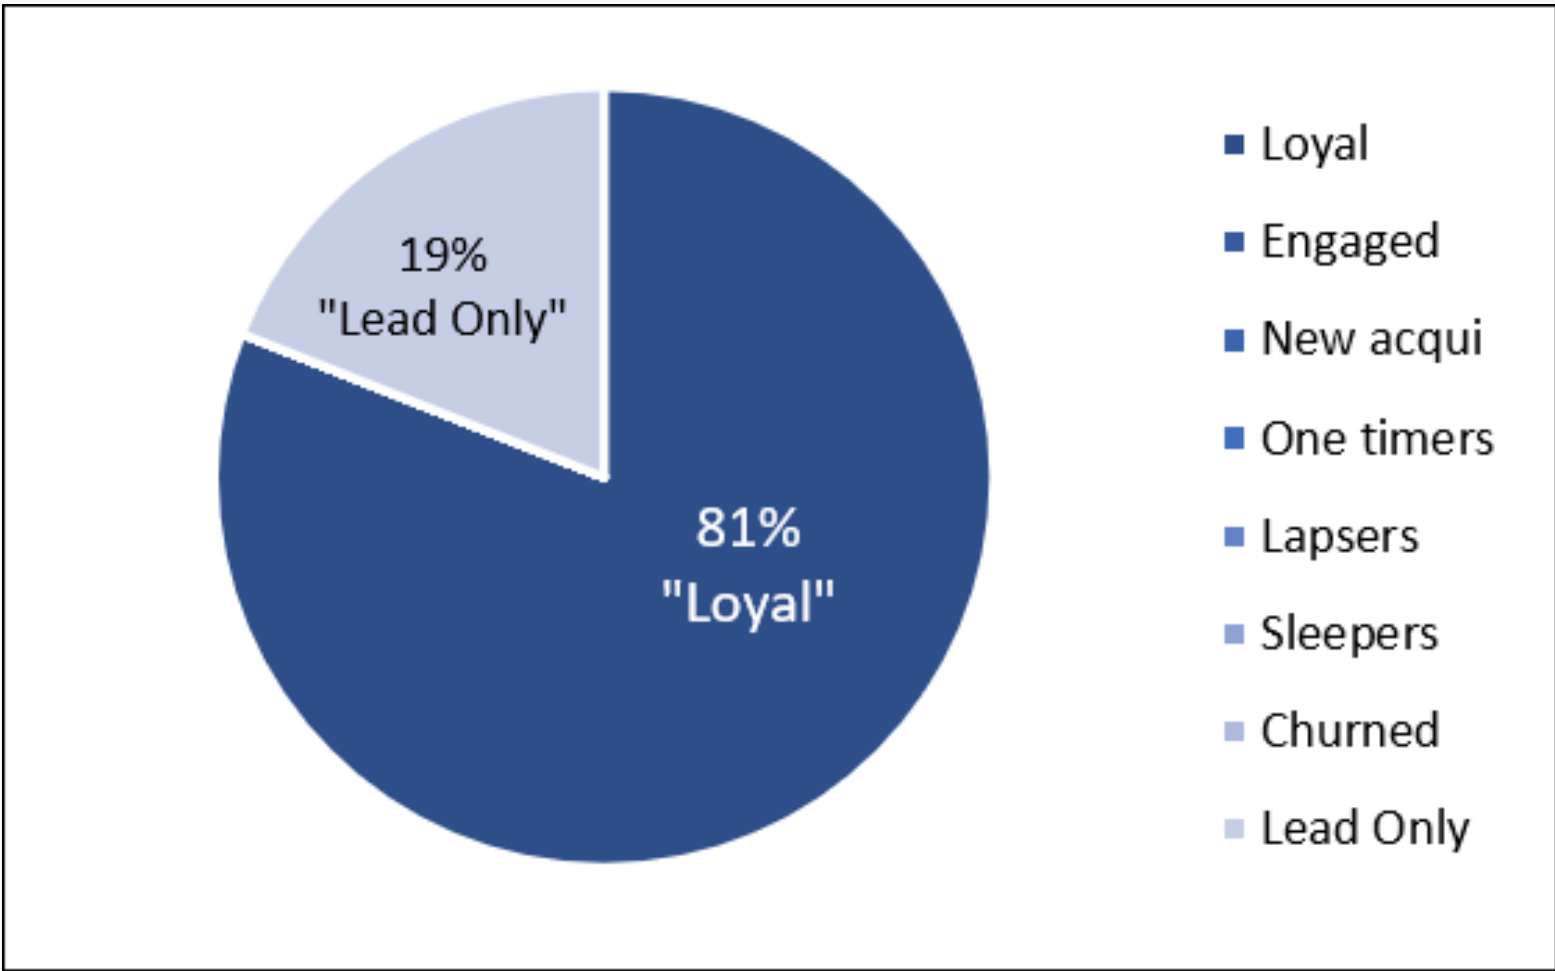

IFS Formula for CRM Segment:

**= IFS (Total_Visits = 0, "Lead Only",
Days Since Visit >=1080, "Churned",
Days Since Visit >=750, "Sleepers",
Days Since Visit >=390, "Lapsers",
AND(Total Visits >=3, Days Since Visit <=360), "Loyal",
AND(Total Visits =2, Days Since Visit <=360), "Engaged",
AND(Total Visits =1, Days Since Visit <=180), "New acqui",
AND(Total Visits =1, Days Since Visit >=2181, Days Since Visit <=360), "One Timers", TRUE,
"Unclassified")**

Note: Recency thresholds were converted from months to days using 30 days per month, with October 31, 2022 as the reference date.

CRM Segmentation Summary

CRM Segment	Customer Count	% of Total Base
Loyal	81	81%
Engaged	0	0%
New acqui	0	0%
One timers	0	0%
Lapsers	0	0%
Sleepers	0	0%
Churned	0	0%
Lead only	19	19%

** Illustrates the percentage distribution of the customer base across CRM segments.*

** Shows the distribution of the 100-member customer base across CRM segments based on visit frequency and recency. The customer base is concentrated in the Loyal and Lead Only segments, with 81% classified as Loyal and 19% as Lead Only.*

Key Insights

- CRM base is concentrated in Loyal (81%) and Lead Only (19%) customers.
- 2022 sales recovered strongly, reaching approximately ₱19.76M with higher AOV.
- Bags are the leading SKU by sales.
- Shangri-La Plaza has the highest customer activity among the stores analyzed.
- Shopping activity is concentrated on weekends.
- Missing demographic and contact information limits CRM targeting.

Actionable Strategies

- Strengthen loyalty and retention programs for Loyal customers.
- Launch welcome/first-purchase campaigns for Lead Only customers.
- Maintain inventory of high-demand products and use bundling or cross-selling.
- Align staffing and inventory with peak shopping days and locations.
- Improve customer-data collection and profile updating.
